Tennis, Zwem, Fitness, Schaak en Mensa

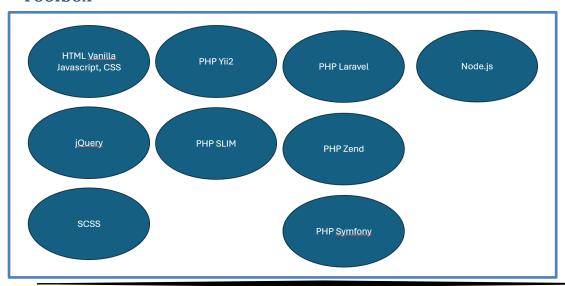

# **Personal qualities**

#### **Profile**

I'm a serious and ambitious young man who enjoys tackling challenges and learning new things. I'm athletic, calm, reliable, meticulous, accurate, motivated, and eager to learn. Since 2015, I've worked as a software developer with various PHP frameworks (for the backend). For APIs, I've used Laravel, Symfony, Zend, Yii2, some Slim, and Node.js product development, which I often combine with Vue.js for the (headless) front-end. I also have experience with legacy bug fixing and am familiar with Linux and Microsoft operating systems, using CI-CD, Git, and Azure Pipelines. I've mostly built on Docker microservices for development. Every company I've worked at has had Jira or some other Kanban or SCRUM board where I worked on ticket processing.

#### **Toolbox**

# **Experience**

## 04-2025-11-2025 Senior PHP Developer - Grip Facility

#### https://www.grip-facility.com/

Facility SAAS company Grip Facility provides the cleaning industry with a complete package to organize cleaning facilities in accordance with legal regulations. Working in an international development team, responsible for financial contract management and product development using PHP frameworks: Symfony, Laravel, our own framework, jQuery + MySQL, and DDD. Development was carried out in Docker containers.

## 09-2015-08-2023 Director/owner Thoflor Dynamics

Thoflor Dynamics was working on a Fintech product, Stock Analysis, which was the V3 that had been created. Stock Analysis used artificial intelligence, scrapers, some automated big data analysis, supercomputing principles, and multi-core processing to assess stock information. Development took place in Docker containers. All TD projects ran on a Linux server. The infrastructure for all projects was custom-built. Bootstrap Vue.js with SCSS (Frontend) + Node.js API + AI production + MySQL (V3 Fintech, AI, Big Data Investing)

## 10-2022-02-2023 Lead PHP Developer – GSN – Infomedics

GSN is a company part of Infomedics, which sells software licenses as a SAAS service for dental professionals using Electronic Patient Records (EPDs). Because their old system was due for an update, I designed the V2 version, which was more secure, faster, more powerful, and more efficient. EPD development was done in Laravel for the backend, combined with Vue.js for the frontend and MariaDB (partly DDD). Development was done in Docker containers.

# 02-2022 - 09-2022 Backend programmer - 1TIS (<a href="https://www.1tis.nl/">https://www.1tis.nl/</a>)

1Tis is a company with a SAAS product that serves the travel industry. It provides travel agencies with a complete package for creating travel packages for consumers. Software development was done using a proprietary framework based on the SLIM Framework. Development was done in TWIG, Javascript, jQuery, and MySQL DDD.

# 12-2020 - 02-2022 Full Stack programmer - Unframed

#### (<a href="https://www.unframed.nl/">https://www.unframed.nl/</a>)

Unframed is a full-service web development and branding organization that creates marketing materials for clients and assists with digital transformations within companies and projects. At Unframed, I worked on various projects, each day different, using Javascript, Vue.js, and jQuery for the frontend and PHP Yii2 Framework for the backend, with MySQL as the database.

# 06-2020 - 12-2020 Full Stack programmer - Code 24 https://code24.nl

Code24 offers a SAAS solution, making it a supplier to mental healthcare providers for Electronic Patient Records (EMRs). My role there was developing new features and fixing bugs. Development was done using Sencha (Ext.js) for the frontend, the Zend Framework for the backend, and MySQL Database. Development was done in Docker containers.

#### 04-2018 – 08-2019 **Jun**i

# Junior developer by You-Get <a href="https://www.you-get.com">https://www.you-get.com</a>

I joined YouGet to work on the Polpo project (at the time, it was still a project startup). Polpo is a political monitoring system that uses scrapers to track all Dutch government publications (powered by artificial intelligence). The big data is then stored and prepared for processing by Elasticsearch, which can provide relevant news for the client based on their interests. I created the startup for the admin panel and worked on the API. Development was done in ES7 Bootstrap Vue.js with SCSS and CSS for the frontend and ES7 Node.js (frameworkless) and a MongoDB database for the backend. I also worked on the DSP and AppTester projects, where I tested the functionality as a tester for IBM BPM software.

# 1996-2012 Freelance examiner for PBNA (VCA Safety Exams)

On-site VCA safety examinations for construction companies and certification of construction companies.

## **Education**

02/2011- 06/2013 Amsterdam University - Finance Minor Investment Banking

Part-time University Business Economics course (propedeutic certificate)

09/2009 -11/2010 INHolland (University – Finance with Minor Accountancy) te

Alkmaar,

Part-time University Finance course (Propedeutic certificate)

Hierbij geef ik u de VOG die u nodig heeft voor: PHP Developer bij Infomedics B.V.

Uit de screening van Justis blijkt dat er geen bezwaren zijn voor de functie of het doel waarvoor u de VOG heeft aangevraagd.

Er is bij deze screening uitgegaan van het volgende profiel: Financiële dienstverlening / Financial services

Op de volgende pagina van deze VOG vindt u meer informatie over dit profiel.

Ik geef de VOG af op grond van artikel 28 van de Wet justitiële en strafvorderlijke gegevens. Wilt u meer weten over de screening door Justis? Op <a href="https://www.justis.nl/vog">www.justis.nl/vog</a> vindt u meer informatie.

Let op: controleer altijd de echtheidskenmerken van de VOG. De Minister voor Rechtsbescherming, namens deze,

M. Visser

Algemeen directeur

Justis, de se la s

4

The Minister for Legal Protection has conducted an investigation into the conduct of the person named in this Certificate and declares that, in view of the risk to society in relation to the purpose for which the certificate has been requested and considering the interests of the person concerned, the investigation has not resulted in any objections to this person in connection with the specific profile mentioned above or the job features indicated on the reverse of this Certificate. The Minister is therefore hereby pleased to issue this Certificate of Conduct, pursuant to section 28 of the Dutch Judicial Data and Criminal Records Act.

De heer den Hartog (hierna betrokkene) heeft voor het hieronder vermelde doel en voor de hieronder vermelde belanghebbende een Verklaring Omtrent het Gedrag aangevraagd.

full-stack ontwikkelaar (PHP) bij Code24

Ik heb een onderzoek naar het gedrag van betrokkene ingesteld. Het onderzoek heeft zich gericht op het specifieke screeningsprofiel Financiële dienstverlening / Financial services.

Uit het onderzoek zijn geen bezwaren gebleken tegen betrokkene voor bovengenoemd specifieke doel. Ik heb daarbij rekening gehouden met het risico voor de samenleving en het belang van betrokkene.

Op grond van artikel 28 van de Wet justitiële en strafvorderlijke gegevens geef ik de Verklaring Omtrent het Gedrag af.

De Minister voor Rechtsbescherming, namens deze,

namens acze,

M. Visser Algemeen directeur Justis, de Leenings

The Minister for Legal Protection has conducted an investigation into the conduct of the person named in this Certificate and declares that, in view of the risk to society in relation to the purpose for which the certificate has been requested and considering the interests of the person concerned, the investigation has not resulted in any objections to this person in connection with the specific profile mentioned above or the job features indicated on the reverse of this Certificate.
